SCANIA

OSPB, PACKAGING ASSORTMENT & SELECTION

STANDARD ASSORTMENT CATALOGUE

2024-06-03
OSPB041, Issue 1

1. Content

1.1. Change history

Issue	Changes
1	This document has been created from scratch and will take over document number OSPB041. The older document will be archived since its content has been included in this catalogue.

2. Introduction

2.1. Standard returnable – Category 1

Through the standard returnable assortment, Scania aims to offer smart, standardised, and modular solutions that meet as many needs as possible. Except from demands connected to carrying the part itself, different aspects such as handling, storing and transport are considered. The environmental impact is minimised through smart design, using recycled materials and enabling circular flows.

The standard returnable assortment includes the returnable packaging. It shall only be applied in open loops and can be ordered from our packaging handling centers. Thus, it is not designed for unique needs or flows and should neither be applied in closed loops.

2.2. Purpose and target group

The purpose of this catalogue is to give an introduction and holistic overview of the standard returnable assortment. By having a good knowledge and awareness of the standard assortment, we believe that it will be used in a better way and in the long run help to avoid the development of special packaging. The target group of this catalogue is all roles and functions with the task of developing packaging instructions and packaging solutions – for example Packaging Engineers and part suppliers.

2. Introduction

2.3. Document structure

The *Standard Assortment Catalogue* aims to give a holistic overview of the standard returnable assortment, category 1. It's closely connected to the following documents.

In the *Packaging Material Categories* document the standard returnable assortment is described in relation to other packaging material categories and it clarifies the ownership and responsibilities.

The *Sorting Manual* is mainly used at breakdowns and packaging handling centers, it describes how the standard returnable assortment should be sorted, washed, repaired and recycled.

The *Handling Guideline* describes how the returnable assortment should be handled and includes stacking and forklift handling.

Other detailed specifications of the standard returnable assortment are available in our system *PackIT* (Packaging Information Tool).

2. Introduction

2.4. Overview - Standard returnable

In our standard returnable assortment, we have 85 MH-numbers that are used in multiple ways. The standard returnable assortment is divided into segments depending on the material and the type of packaging. The main segment is based on the material which is plastic, wood, steel and other materials. Each segment is then divided into groups by the type of packaging.

The standard plastic assortment consists of pallet kits, lids, boxes, spacers and replacement parts for the plastic pallet kits. The standard wood assortment consists of pallets, lids, collars, spacers, blocks and replacement parts. The standard steel assortment consists of pallet, corner posts and collar retainers. The standard other assortment contains packaging made from multi-material and it consists of two foam spacers.

Our aim is to have a standard returnable assortment based on mono-materials and if that is not possible the materials should be easily separable for recycling.

Plastic					Wood						Steel			Other
Pallet Kit	Lid	Box	Spacer	Replacement	Pallet	Lid	Collar	Spacer	Blocks	Replacement	Pallet	Cornerpost	Collar retainer	Spacer, foam

2. Introduction

2.5. Definitions

All dimensions in the catalogue are in millilitres.

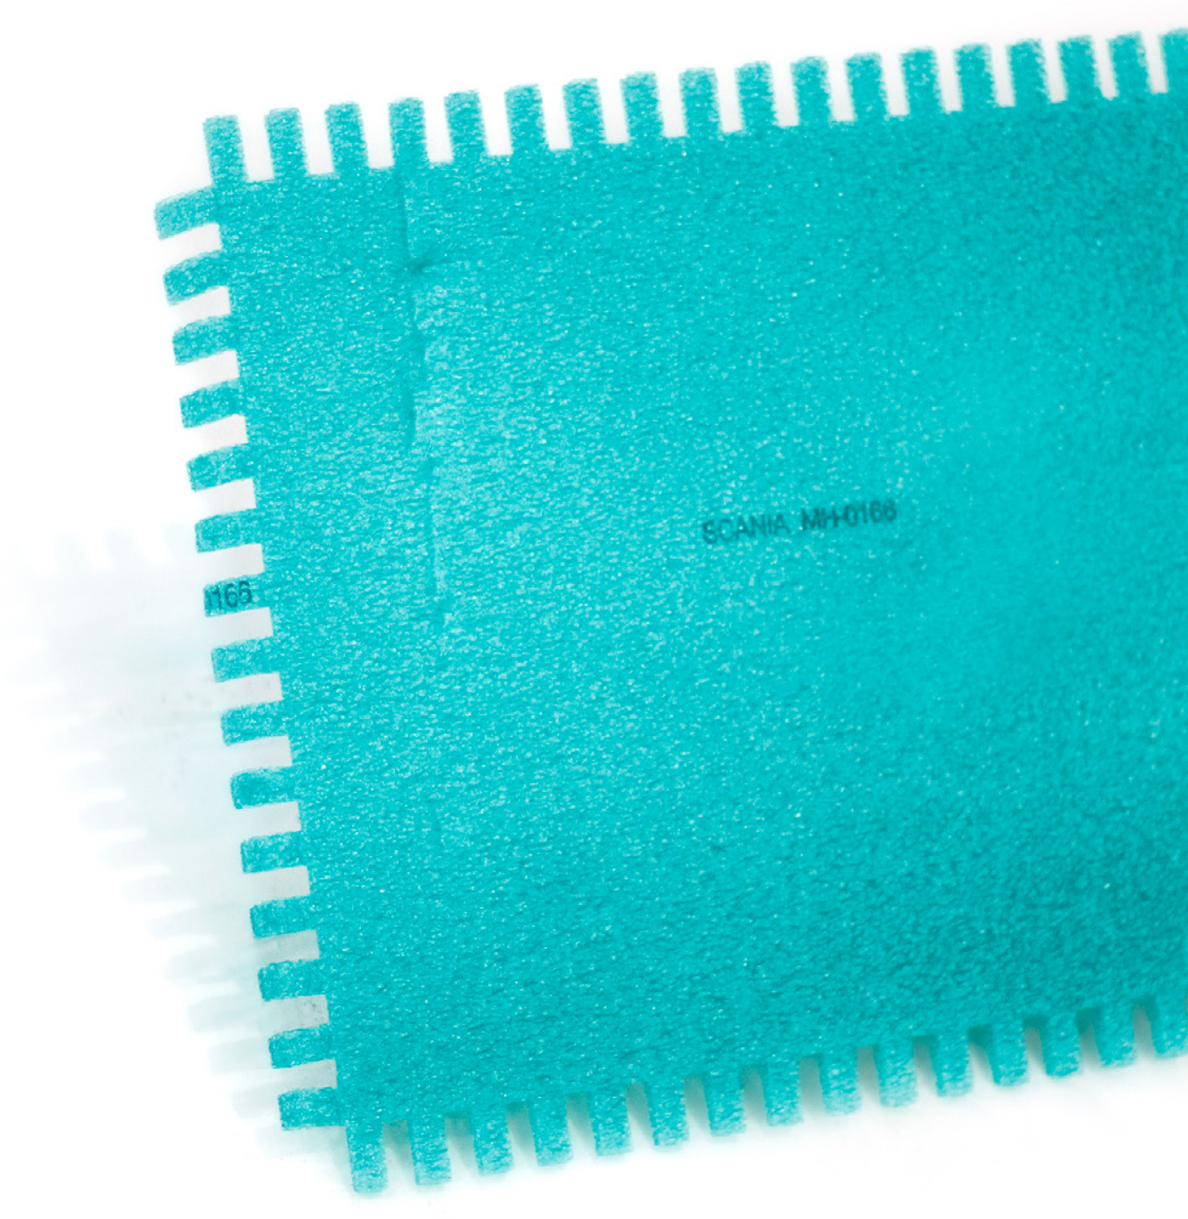
A replacement refers to a packaging spare part.

2.6. Material abbreviations

HDPE	High-density polyethylene
LDPE	Low-density polyethylene
PP	Polypropylene
PE	Polyethylene
PS	Polystyrene
EPE	Expanded polyethylene
EPS	Expanded polystyrene
PC	Polycarbonate
PET	Polyethylene terephthalate
ABS	Acrylonitrile butadiene styrene
PVC	Poly vinyl chloride

2.7. Contact information

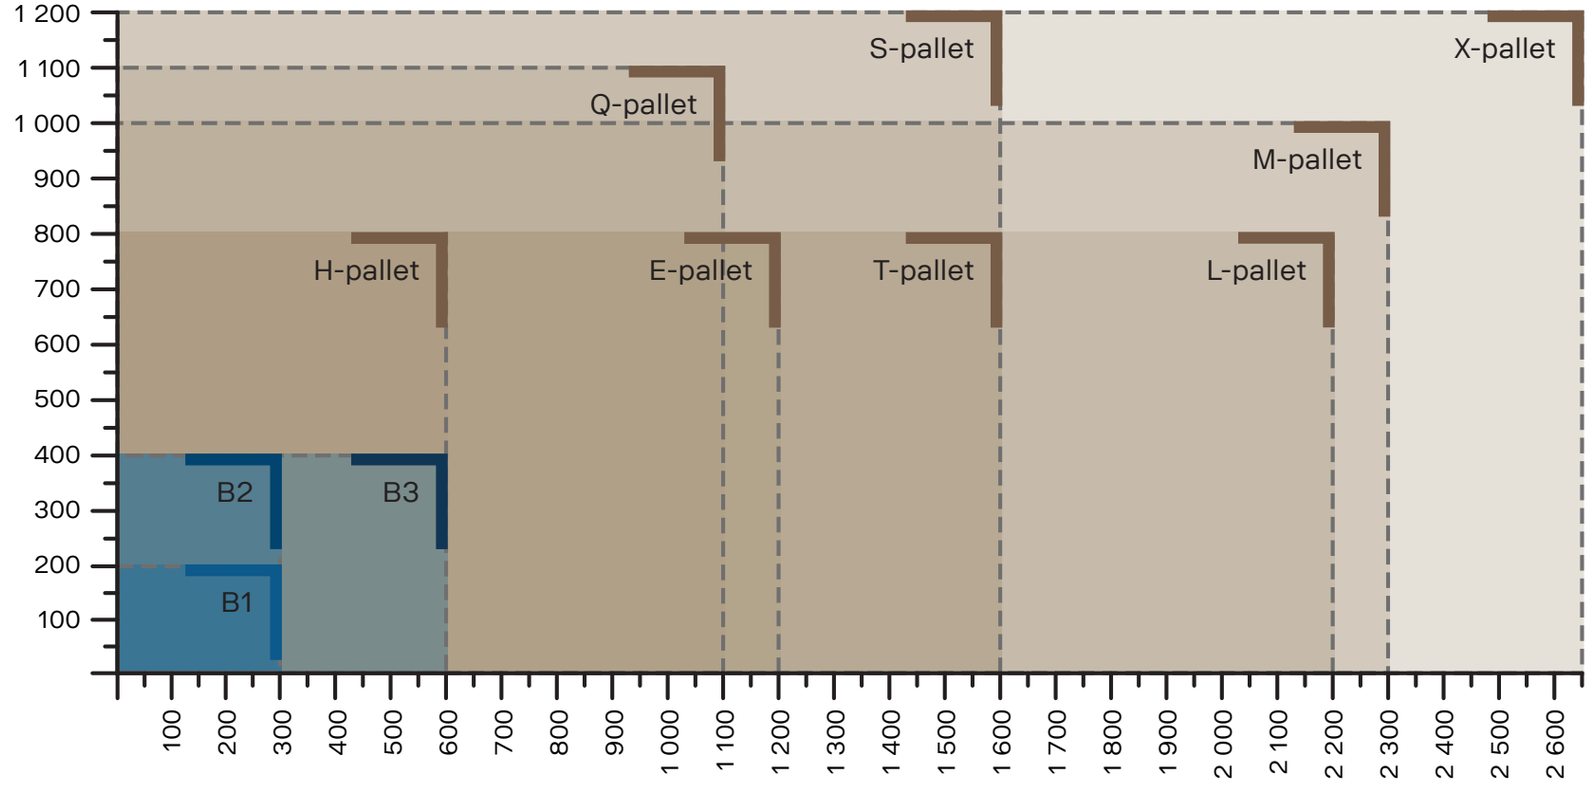
If you have any questions, feel free to contact us:
packaging.assortmentandselection@scania.com



2. Introduction

2.8. Scale of reference

This illustration aims to provide a scale of reference for the sizes of our boxes and pallets.



3. Plastic Assortment

We strive for a plastic assortment that is based on mono-materials and made from recycled plastic. Our aim is to design the packaging so it's suitable for material recovery at the end-of-life, which means that the packaging can be recycled after it has been used and fulfilled its purpose.

In 2022 the project *Next Generation Packaging – Plastic* was initiated to create a more sustainable and efficient plastic packaging assortment by changing from virgin raw materials to recycled materials and changing from all different types of plastic to polypropylene (PP). This project is a big step towards our goal of having a plastic assortment based on 80% recycled plastic material.

In the near future we would like to extend our collaborations with packaging manufacturers to establish circular flows.

Plastic packaging can easily be cleaned, which is an advantage for returnable packaging, and plastic is often preferred when cleanliness is a demand. Another positive aspect of choosing plastic as a material for packaging is that it on average weighs less than the same packaging made from wood.

3.1. Pallet Container Kit

MH-1621

H-Plastic Pallet Kit

Material: HDPE, PS, PE, PP
Weight: 18 680 g

Outer Dimension: 810 x 610 x 380
Inner Dimension: 755 x 555 x 175

MH-1622

H-Plastic Pallet Kit

Material: HDPE, PS, PE, PP
Weight: 20 360 g

Outer Dimension: 810 x 610 x 580
Inner Dimension: 755 x 555 x 375

MH-1623

H-Plastic Pallet Kit

Material: HDPE, PS, PE, PP
Weight: 22 040 g

Outer Dimension: 810 x 610 x 780
Inner Dimension: 755 x 555 x 575

More information about the MH-numbers can be found on PackIT.

3.1. Pallet Container Kit

Continued

MH-1612

E-Plastic Pallet Kit

Material: HDPE, PS, PE, PP
Weight: 34 800 g

Outer Dimension: 1 230 x 825 x 600
Inner Dimension: 1 160 x 760 x 345

MH-1613

E-Plastic Pallet Kit

Material: HDPE, PS, PE, PP
Weight: 37 200 g

Outer Dimension: 1 230 x 825 x 800
Inner Dimension: 1 160 x 760 x 545

MH-1614

E-Plastic Pallet Kit

Material: HDPE, PS, PE, PP
Weight: 39 000 g

Outer Dimension: 1 230 x 825 x 950
Inner Dimension: 1 160 x 760 x 695

More information about the MH-numbers can be found on PackIT.

3.2. Lid

MH-3148

Lid to B1

Material: PET
Weight: 20 g

Outer Dimension: 300 x 200 x 15
Inner Dimension: n/a

MH-4374

Lid to B2

Material: PET
Weight: 40 g

Outer Dimension: 400 x 300 x 15
Inner Dimension: n/a

MH-4375

Lid to B3

Material: PET
Weight: 80 g

Outer Dimension: 600 x 200 x 15
Inner Dimension: n/a

MH-4319

H-Lid, plastic

Material: PC or Recycled PP*
Weight: 1 450 g

Outer Dimension: 820 x 620 x 60
Inner Dimension: n/a

*During 2023 the lid will be implemented in recycled PP.
More information about the MH-numbers can be found on PackIT.

3.3. Box

MH-3147

Box – B1

Material: Recycled PP or PP*
Weight: 570 g

Outer Dimension: 297 x 198 x 147
Inner Dimension: 243 x 162 x 129

MH-4147

Box – B2

Material: Recycled PP or PP*
Weight: 1080 g

Outer Dimension: 396 x 297 x 147
Inner Dimension: 345 x 260 x 129

MH-6147

Box – B3

Material: Recycled PP or PP*
Weight: 1 820 g

Outer Dimension: 594 x 396 x 147
Inner Dimension: 544 x 359 x 129

*Since 2023 the boxes are made from recycled plastic in a darker blue.
More information about the MH-numbers can be found on PackIT.

3.3. Box

Continued

MH-0476

Foldable Box – B4

Material: Recycled PP or PP*
Weight: 2 418 g

Outer Dimension: 594 x 395 x 215
Inner Dimension: 560 x 362 x 194

MH-0474

Foldable ESD Box – B5

Material: ESD PP
Weight: 2 418 g

Outer Dimension: 594 x 395 x 215
Inner Dimension: 560 x 362 x 194

MH-0475

Foldable Box – B6

Material: Recycled PP or PP*
Weight: 2 989 g

Outer Dimension: 594 x 395 x 315
Inner Dimension: 560 x 362 x 294

*Since 2023 the boxes are made from recycled plastic in the colour grey. Previously, the boxes were coloured (MH-0476 was green and MH-0475 was yellow) and those colours are still in the loop.

More information about the MH-numbers can be found on PackIT.

3.4. Spacer

MH-0040

H-Spacer, recycled plastic

Material: Recycled HDPE
Weight: 1 050 g

Outer Dimension: 745 x 545 x 2,7
Inner Dimension: n/a

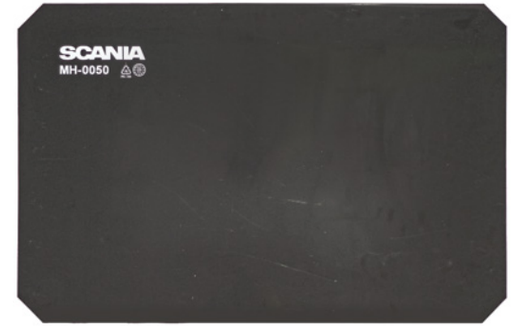
MH-0140

H-Spacer, plastic

Material: HDPE or PP
Weight: 1 170 g

Outer Dimension: 745 x 545 x 3
Inner Dimension: n/a

MH-0050



E-Spacer, recycled plastic

Material: Recycled HDPE
Weight: 2 210 g

Outer Dimension: 1 145 x 745 x 2,7
Inner Dimension: n/a

MH-0150

E-Spacer, plastic

Material: HDPE or PP
Weight: 2 500 g

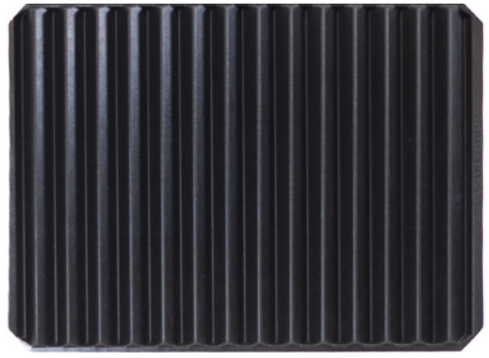
Outer Dimension: 1 145 x 745 x 3
Inner Dimension: n/a

More information about the MH-numbers can be found on PackIT.

3.4. Spacer

Continued

MH-1977



Ribbed H-Spacer

Material: ABS
Weight: 900 g

Outer Dimension: 745 x 555 x 30
Inner Dimension: n/a

MH-0145

Stuffed Spacer

Material: EPE, LDPE
Weight: 375 g

Outer Dimension: 1 500 x 100 x 100
Inner Dimension: n/a

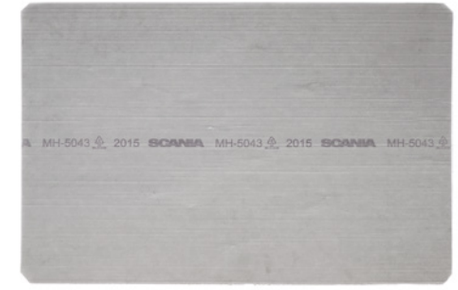
MH-5042

H-Spacer, textile

Material: PP, Chalk
Weight: 178 g

Outer Dimension: 750 x 550 x 3
Inner Dimension: n/a

MH-5043



E-Spacer, textile

Material: PP, Chalk
Weight: 370 g

Outer Dimension: 1 150 x 750 x 3
Inner Dimension: n/a

More information about the MH-numbers can be found on PackIT.

3.4. Spacer

Continued

MH-4201

B1-Spacer, textile

Material: PP, Chalk
Weight: 16 g

Outer Dimension: 235 x 155 x 3
Inner Dimension: n/a

MH-4202

B2-Spacer, textile

Material: PP, Chalk
Weight: 37 g

Outer Dimension: 350 x 255 x 3
Inner Dimension: n/a

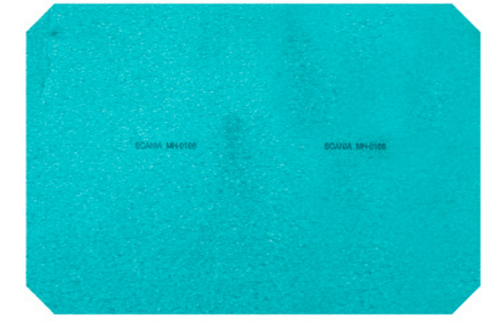
MH-4203

B3-Spacer, textile

Material: PP, Chalk
Weight: 85 g

Outer Dimension: 535 x 350 x 3
Inner Dimension: n/a

MH-0166



SB Spacer

Material: EPE
Weight: 35 g

Outer Dimension: 510 x 340 x 10
Inner Dimension: n/a

More information about the MH-numbers can be found on PackIT.

3.5. Replacement

MH-1521

Sleeve 200mm, H-pallet

Material: PP
Weight: 1 680 g

Outer Dimension: 775 x 610 x 200
When collapsed: 775 x 40 x 200

MH-1522

Sleeve 400mm, H-pallet

Material: PP
Weight: 3 360 g

Outer Dimension: 775 x 610 x 400
When collapsed: 775 x 40 x 400

MH-1523

Sleeve 600mm, H-pallet

Material: PP
Weight: 5 040 g

Outer Dimension: 775 x 610 x 600
When collapsed: 775 x 40 x 600

More information about the MH-numbers can be found on PackIT.

3.5. Replacement

Continued

MH-1726

Plastic H-pallet

Material: HDPE
Weight: 9 000 g

Outer Dimension: 810 x 610 x 150
Inner Dimension: n/a

MH-1727

Plastic Tray, H-pallet

Material: PP, PS
Weight: 4 000 g

Outer Dimension: 790 x 590 x 63
Inner Dimension: n/a

MH-1728

Plastic Lid, H-pallet

Material: PP, PS
Weight: 4 000 g

Outer Dimension: 810 x 610 x 71
Inner Dimension: n/a

More information about the MH-numbers can be found on PackIT.

3.5. Replacement

Continued

MH-1512

Sleeve 400mm, E-pallet

Material: PP
Weight: 4 800 g

Outer Dimension: 1 195 x 780 x 400
When collapsed: 1 195 x 40 x 400

MH-1513

Sleeve 600mm, E-pallet

Material: PP
Weight: 7 200 g

Outer Dimension: 1 195 x 780 x 600
When collapsed: 1 195 x 40 x 600

MH-1514

Sleeve 750mm, E-pallet

Material: PP
Weight: 9 000 g

Outer Dimension: 1 195 x 780 x 750
When collapsed: 1 195 x 40 x 750

More information about the MH-numbers can be found on PackIT.

3.5. Replacement

Continued

MH-1716

Plastic E-pallet

Material: HDPE
Weight: 18 000 g

Outer Dimension: 1 220 x 820 x 150
Inner Dimension: n/a

MH-1715

Plastic Tray, E-pallet

Material: PP, PS
Weight: 6 000 g

Outer Dimension: 1 210 x 805 x 50
Inner Dimension: n/a

MH-1714

Plastic Lid, E-pallet

Material: PP, PS
Weight: 6 000 g

Outer Dimension: 1 230 x 825 x 65
Inner Dimension: n/a

More information about the MH-numbers can be found on PackIT.

4. Wood Assortment

We aim to maximise the share of FSC- or PEFC-certified wood in our assortment and increase our knowledge of the origin of the wood to ensure legal and sustainable forestry. Certified wood ensures that products come from responsibly managed forests that provide environmental, social and economic benefits.

The wooden packaging assortment consist mostly of timber from pine or spruce. Wood products are considered as a renewable source. Forests have a crucial key role for the climate and biodiversity; when trees perform photosynthesis they extract carbon dioxide (CO_2) out of the air, bind it in sugar and release oxygen – the best carbon capture technology ever invented. Sustainable forestry contributes to conserving natural forests, prevents deforestation and protects wildlife habitats.

The way to move from a linear to a circular life-cycle of wood packaging is to repair or reuse the material. For example, we estimate that around 450 000 Scania pallets are repaired every year, this saves around 4 000 tonnes of CO_2e per year.

One disadvantage of wood compared to other materials, such as plastic, is the weight. Wood has an advantage in terms of quality, strength and lifespan. Another positive aspect of wood is that it can be easily repaired.

4.1. Pallet

MH-1874

H-pallet

Material: Wood*, Galvanized Steel
Weight: 12 000 g

Outer Dimension: 800 x 600 x 120
Inner Dimension: n/a

MH-1875

E-pallet

Material: Wood*, Galvanized Steel
Weight: 24 000 g

Outer Dimension: 1 200 x 800 x 150
Inner Dimension: n/a

MH-7555

T-pallet

Material: Wood*, Galvanized Steel
Weight: 30 000 g

Outer Dimension: 1 600 x 800 x 150
Inner Dimension: n/a

MH-7001

L-pallet

Material: Wood*, Galvanized Steel
Weight: 45 000 g

Outer Dimension: 2 200 x 800 x 150
Inner Dimension: n/a

4.6. Replacement

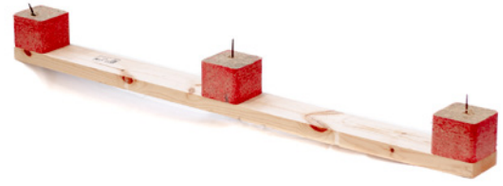
MH-3667

Runner with nail, H-pallet

Material: Wood*, Chipboard, Galv Steel
Weight: 1 000 g

Outer Dimension: 600 x 98 x 75
Inner Dimension: n/a

MH-3155



Runner with nail, E-pallet

Material: Wood*, Chipboard, Galv Steel
Weight: 3 000 g

Outer Dimension: 1 200 x 100 x 103
Inner Dimension: n/a

MH-3156

Chipboard block

Material: Chipboard
Weight: 750 g

Outer Dimension: 95 x 95 x 78
Inner Dimension: n/a

*Pine or Spruce

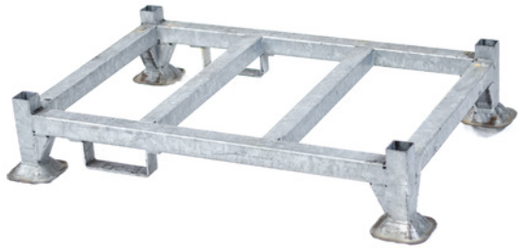
More information about the MH-numbers can be found on PackIT.

5. Steel Assortment

The share of steel in our standard assortment is limited due to the fact that steel is heavy to transport and handle. Steel can be suitable when there are high requirements for the strength and weight capacity, tight tolerances or a geometry that is difficult to achieve in other materials. Another advantage of steel is that it generally has a long lifespan.

5.1. Pallet

MH-1799



U-pallet

Material: Galvanized Steel
Weight: 37 000 g

Outer Dimension: 1 300 x 900 x 245
Inner Dimension: n/a

More information about the MH-numbers can be found on PackIT.

5.2. Cornerpost

MH-1794

Cornerpost 450

Material: Galvanized Steel
Weight: 3 300 g

Outer Dimension: 625 x 60 x 60
Inner Dimension: n/a

MH-1795

Cornerpost 600

Material: Galvanized Steel
Weight: 4 300 g

Outer Dimension: 775 x 60 x 60
Inner Dimension: n/a

MH-1796

Cornerpost 900

Material: Galvanized Steel
Weight: 6 000 g

Outer Dimension: 1 075 x 60 x 60
Inner Dimension: n/a

More information about the MH-numbers can be found on PackIT.

5.3. Collar retainer

MH-1825

Collar retainer, 1 collar*

Material: Galvanized Steel
Weight: 200 g

Outer Dimension: 250 x 20 x 30
Inner Dimension: n/a

MH-1826

Collar retainer, 2 collar*

Material: Galvanized Steel
Weight: 300 g

Outer Dimension: 450 x 20 x 30
Inner Dimension: n/a

MH-1827

Collar retainer, 3 collar*

Material: Galvanized Steel
Weight: 400 g

Outer Dimension: 650 x 20 x 30
Inner Dimension: n/a

MH-1828

More information about the MH-numbers can be found on PackIT.

6. Other Assortment

Our aim is to have a standard returnable assortment based on mono-materials and if not possible, the materials should be easily separable for recycling. The spacers in the other assortment are made of cardboard and foam which cannot be separated and therefore they are not being recycled. This is against our principles, so we are investigating solutions in other materials.

6.1. Spacer

MH-0240

H-spacer, foam

Material: Cardboard, EPE
Weight: 200 g

Outer Dimension: 760 x 560 x 4
Inner Dimension: n/a

MH-0250

E-spacer, foam

Material: Cardboard, EPE
Weight: 400 g

Outer Dimension: 1 160 x 760 x 4
Inner Dimension: n/a

More information about the MH-numbers can be found on PackIT.

7. Upcoming versions

7.1. To be added per MH-number

- Suitable for
- Can be combined with
- Load capacity

7.2. Sections to be added

- Good examples
- Misusage
- Size chart, common

7.3. Chapters to be added

- One-way packaging
- Packaging Codes
