6345	Currency identification code	M an3	3 Target currency Code specifying a monetary unit. Use ISO 4217 three alpha code. Target Currency specifies the currency that has to be used for accounting, taxation or calculation purposes in a different currency.	: SEK
6343	Currency type code qualifier	M an3	Currency purpose	:3
			3 Home currency	
5402	Currency exchange rate	D n12	Currency Conversion Rate	+9.987'

Note: Invoice has to contain the invoice currency and may contain home currency. Invoicing currency is always to be given in the first occurrence of the CUX segment, C504#1 as follows: 6347 = '2', 6345 = Currency, 6343 = '4'

If a different home currency is to be given, the second occurrence of the CUX segment, C504#2 is to be used as follows: Second 6347 = '3', 6345 = Currency, 6343 = '3' and data element 5402 contains the currency conversion rate.

Home currency: In some countries it is a requirement that, for invoicing in a foreign currency, the invoice taxable and tax (e.g. VAT) amounts must also be expressed in home currency. Relating this to the CUX segments, authorities would require that the invoicing currency and the home currency is shown together with the rate of exchange (element 5402).

Example: CUX+2:EUR:4+3:SEK:3+10.99540'
