# **SCANIA GLOBAL DESPATCH ADVICE FOR SEQUENCE DELIVERIES**

## **IMPLEMENTATION GUIDELINES V1, R0**

## 1. General.

### ***Global Despatch Advice DESADV specification.***

The specification is based on The Joint Automotive Industries (JAI) Global DESADV. Based on EDIFACT Directory, D07A, [www.odette.org](http://www.odette.org)

The Scania Despatch Advice for Sequenced Deliveries <http://supplier.scania.com>  
(Miscellaneous, EDI)

## 2. Differences between Global Despatch Advice for Sequenced Deliveries and the current Scania AVIEXP Version 2.1 Functional profile Odette AVIEXP V5R1 and Odette AVIEXP version 3.

- UNH, message header 0057 associated assigned codes will identify this specification.
- Consignee, NAD 3035, value CN is changed to Ship To, NAD 3035 ST.
- LOC segments are added. One message shall be created per LOC (7) Place of delivery.
- Consignor, NAD 3035, value CZ is changed to Ship From, NAD 3035 SF.
- PCI 4233 (17) "Not used".
- Manufacturing Reference Number added in GIR 7405 . One CPS loop shall be created per Manufacturing Reference Number.
- GIN 7405 (Manufacturers) Serial number has been added. This information shall only be used in special conditions and on request from Scania.
- GIR 7405 Marking/Label Number is moved to GIN 7405.
- LIN 1222 "Not used"

## 3. The purpose of the DESADV message.

The purpose of the despatch advice message is to provide the final "Ship to" with detailed information relating to the actual contents of a despatch sent by a "Ship from". The message is based upon the definition of a despatch as a specified amount of goods sent by a specified "Ship from" to a specified "Ship to" on a specific occasion.

Information on location and manufacturing reference numbers are added to the message to ensure the Ship to party that they received delivery for all "chassis" per production location.

## 4. Create a DESADV.

The structure of this message is different compared to DESADV for batch deliveries.

- One message shall be created per (LOC) Place of delivery.

**3(35)**

- 
- One CPS loop shall be created per identical packages per Manufacturing reference number.
  - All articles in a same package shall be given in the same CPS loop by repeating the LIN loop per article number.

The contents of a DESADV shall reflect the real contents of the consignment. Transmission of the message must not take place before the time that the consignment leaves the Ship from (Supplier).

The supplier is obliged to ensure that the DESADV reaches Scania well in advance of the goods arriving to Scania. At all times the supplier must be capable of submitting the DESADV within one hour of the consignment leaving the consignor.

DESADV sent too late will cause the same problem at the goods reception at Scania as when a DESADV is not sent at all.

Information is always collected from the most recent DELJIT/SYNCRO and DELFOR/DELINS.

Non-significant zeros and blanks in data strings should be suppressed. However, if an alphanumeric field contains leading zeros for some data and the same data occurs in EDI-messages and/or transport labels and/or accompanying documents then the leading zeros must occur in all instances. In such a case the leading zeros are to be looked upon as being significant.
