GENERAL

- Scania cares about environment and therefore we prefer that all invoices are sent electronically, in addition, electronic invoices are more cost effective and processed faster than PDF and paper invoices. The electronic alternatives are EDI E-invoices and PDF E-invoices. We don't prefer to receive paper invoices, but of course we accept them if the above options cannot be applied.
- The invoice shall refer to an order number and/or a Scania reference or requestor name (including department or cost centre). The identity of the production unit on the second line is, for production parts and Scania spare parts, mostly to be found in the delivery schedules.
- The legal identity of each company shall always be given on the first row.
- Sometimes the Bill to address (invoice address) differs whether the invoice relates to dispatch of production parts, Scania spare parts, prototypes or other goods or Services. When this is the case it is mentioned in the comments column.
- The Bill to address (invoice address) is normally given in the order or delivery schedule. In some cases it might happen that it differs from what is said in this list. If so, please use the invoice address from the order or delivery schedule.
- You can search for information in this document. For Adobe Reader use shortcut 'Ctrl+F' or go to 'Edit -> Find' and type the words or numbers you would like to locate.
- Addresses are arranged in order of 1) Business Area, 2) Company Name, 3) Unit Name.
- For more information on how to invoice Scania, go to scania.com/invoicing-scania
- Paper invoices must have a correct envelope address. See separate columns for 'Bill to address' (address on invoice) and 'Envelope address' (address on envelope) in the list.

This list is created by Scania Financial Processes Centre. If you have any questions or remarks, please send an e-mail to invoices.to@scania.com.
