

Scania approved surface treatment sub-contractors Issue 10 2021-05-01

Surface treatment is regarded as a critical process where suppliers (1st Tier) are only allowed to use sub-contractors (Tier 2-3) that are approved by Scania according to CVS010.

An approval from Scania indicates that the supplier has the **ability** to fulfill:

- STD4310 Requirements for supplier of surface treatment
- CVS010 Traton customer requirements.

This does not mean that Scania accept responsibility for the quality output from suppliers on the approved sub-contractor list.

The 1st Tier supplier remains responsible for all quality assurance issues and compliance with STD4310 and CVS10

*** Note - There is a separate approved list for suppliers (Tier 1) with internal surface treatment. (only for Scania internal use)**

Organic process according to STD4111 x3-Px-xxxxxxx (exposure level 3)
