

Supplier Information letter for EDI Cloud migration

Concerns: Announce implementation of new EDI cloud solution with partner Seeburger

Dear supplier,

We at Scania EDI are happy to announce that we are **implementing a new EDI Cloud Solution at our new EDI partner, Seeburger**. This step is part of the ongoing FEAST (Future EDI At Scania Transition) initiative, a strategic project designed to enhance our EDI capabilities.

The purpose of this information letter is to explain how this implementation will affect you as a supplier to Scania and walk you through the upcoming migration process. Mandatory actions will be required from you side, otherwise, you might lose the EDI connection to Scania.

What are the benefits for migrating to cloud?

The migration aims to enhance the efficiency and resilience of our EDI ecosystem by leveraging cloud capabilities provided by Seeburger. This transition is expected to improve flexibility, elasticity, and uptime security, reducing the risk of potential downtime and strengthening operational continuity.

Implications for suppliers using classic EDI:

- You will need to set-up new communication parameters, conduct a connectivity test and enable the connection to cloud at a specific go-live date.

Step-by-step guide on what will happen next:

- 1. Set up new communication parameters:** Seeburger will contact you via email to initiate the OFTP2 connection setup. Upon receiving the request, confirm your readiness to proceed.
- 2. Perform a connectivity test:** Collaborate with Seeburger to perform a connectivity test to ensure successful communication between your system and Seeburger's cloud platform.
- 3. Get ready for Go-Live:** Receive the Go-Live date from Seeburger. On the specified date, enable the connection in your system to the cloud setup. *NOTE! If you supply spare parts to Scania, please keep both the old and new cloud connection open.*
- 4. Completion of migration:** Congratulations! You are now officially part of Future EDI at Scania Transition.

Please note that failure to complete the necessary actions above on your end may result in the loss of the EDI connection to Scania. Therefore, we kindly ask you to reply when Seeburger contacts you.

We are confident that this transition will not only streamline our EDI processes but also contribute to an elevated experience for our valued suppliers at Scania. We appreciate your ongoing support as we embark on this journey towards a more advanced and efficient EDI landscape

Kind regards,
Scania EDI team

If you've received information or are involved in the industry standards project, please understand that this is a separate project.
